

**The Livestock Conservancy  
Quick Reference Guide to Heritage Geese**

Photos	Breed	Origin	CPL Status	Purpose	Adult Weight M/F (lbs.)	Color	Egg color	Egg Size	Rate of Lay	Temperament	Brooding & Mothering	Experience	Climate	Notes
	<b>African</b>	Asia	Watch	Meat	20/18	Gray/brown, buff, white	White	Extra Large	20-45	Some males are aggressive	Fair to good	Novice/Intermediate	Hot and cold	Takes several years to fully mature; need shelter in cold to prevent frostbite on knob
	<b>American Buff</b>	United States	Watch	Meat	18/16	Buff	White	Large	25-35	Docile, curious	Good	Novice	Hot and cold	Not as noisy as some other goose breeds
	<b>Chinese</b>	Asia	Watch	Meat, Eggs	12/10	Brown, white	White	Medium to Large	40-100+	Docile	Poor to fair	Novice	Hot and cold	Good "watch dogs"; good for small properties; need shelter in cold to prevent frostbite on knob
	<b>Cotton Patch</b>	United States	Threatened	Meat	14/12	White male/Grey or saddleback female	White	Large	12-16 eggs / year (6-8 eggs/clutch, twice a year)	Docile, active	Good	Intermediate	Hot to moderate	Most strains retain the ability to fly; good for weeding
	<b>Pilgrim</b>	United States	Threatened	Meat	14/13	White male/Grey female	White	Large	25-40	Docile	Good	Novice	Hot and cold	Fairly peaceful birds; goslings can be sexed as day-olds
	<b>Pomeranian</b>	Germany	Critical	Meat	17/15	Grey, buff, saddleback, or white	White	Large	25-40	Some males are aggressive	Good	Novice/Intermediate	Hot and cold	Color can be a challenge to perfect; good "watchdogs"
